

21.05 RESIDENTIAL

13/02/2014
C96

21.05-1 Overview

13/02/2014
C96

This section applies to all land zoned Residential 1, Residential 3, Mixed Use and Activity Centre Zone located west of the Mullum Mullum Creek and the township of Warrandyte and parts of Wonga Park. These areas are shown on Residential Framework Plan 1.

Housing

Managing change and growth in the residential areas of Manningham is a key issue facing Council. Infill residential development and redevelopment of key strategic sites that consolidates the role of established urban areas and reduces developmental pressure in the areas with environmental values will be encouraged.

Whilst couples with children are the predominant household structure in Manningham, the key emerging trend is the smaller household type. The continuing ability of our residential areas to accommodate the changing lifestyles and housing needs of current and future populations is becoming an increasingly important issue. Whilst single detached dwellings will continue to represent the largest proportion of Manningham's housing stock, there will be a need for a greater mix of housing in the form of medium and higher density residential developments. Higher density housing will be encouraged in close proximity to activity centres and along major roads and transport routes.

The *Manningham Residential Strategy* (2012) and the *Manningham Residential Character Guidelines* (2012) are key policy documents that seek to direct and manage the level of change in a manner that will best serve the interests of the municipality in terms of housing needs, built form and environmental outcomes. These documents encourage a range of housing types that meet the changing needs of the community and promote high design standards.

Key Redevelopment sites offer urban consolidation opportunities in well serviced areas and localities. The Eastern Golf course site is an identified Key Redevelopment Site in Manningham.

Subdivision

Effective subdivision design should respond to site opportunities and constraints. There are limited opportunities for large scale subdivision in Manningham. A key issue for Council is inappropriate infill subdivision of smaller lots.

Built form and neighbourhood character

Residential developments must be well designed, site responsive and not adversely impact on neighbours, the surrounding environment, streetscape and existing or preferred neighbourhood character.

It is intended to retain the existing bushland character of the Warrandyte township and Wonga Park area.

The key strategic directions for future residential development are illustrated in Map 1 - Residential Character Precincts, in this Clause.

Four precincts have been identified:

Precinct 1: Residential Areas Removed from Activity Centres and Main Roads

Precinct 2: Residential Areas Surrounding Activity Centres and along Main Roads

Precinct 3: Residential areas with Predominant Landscape Features

Precinct 4: Post 1975 Residential Areas.

The precincts seek to channel increased housing densities around activity centres and main roads where facilities and services are available. In areas which are removed from these facilities a lower intensity of development is encouraged. A low residential density is also encouraged in areas that have identified environmental or landscape features.

Precinct 1 – Residential Areas Removed from Activity Centres and Main Roads

This precinct applies to the areas that are removed from activity centres (shopping centres) and main roads.

An incremental level of change is anticipated in Precinct 1. The future development vision is to encourage development that reinforces existing front and rear setbacks and site coverage to provide opportunities for landscaping and retain areas of open space. Accordingly, this precinct will encourage a less intense urban form.

Whilst the design of future dwellings may vary from the existing built form, dwellings in this area will need to provide increased open space for the planting or retention of trees and associated landscaping. The prevailing character of low front fences, retaining walls or the absence of front fences will also be encouraged.

Precinct 2 – Residential Areas Surrounding Activity Centres and along Main Roads

This precinct applies to the areas surrounding activity centres and the areas along Main Roads.

The activity centres included in this precinct are: Bulleen Plaza, Tunstall Square, Macedon Square, Jackson Court, Donburn, Devon Plaza, Templestowe Village, The Pines and Doncaster Hill.

These areas are within close proximity to activity centres (local shopping centres) and community facilities. The Doncaster Hill Activity Centre is regarded as the prime location for redevelopment for residential, commercial and community uses and is identified as the only Principal Activity Centre in the municipality.

The main roads identified in this precinct are Doncaster, Tram and Elgar Roads, Manningham and part of Thompsons, Blackburn and Mitcham Roads. These areas are developed with a range of commercial and residential uses.

Whilst landscaping exists along the main roads, there are opportunities to introduce better landscaping standards to improve the appearance of the main roads in the municipality.

A substantial level of change is anticipated in Precinct 2. Whilst this area will be a focus for higher density developments, there are three sub-precincts which each stipulate different height, scale and built form outcomes to provide a transition between each sub-precinct and adjoining properties, primarily in Precinct 1 – Residential Areas Removed from Activity Centres and Main Roads.

The three sub-precincts within Precinct 2 consist of:

Sub-precinct – Main Road (shown on Manningham Planning Scheme maps as DDO8-1) is an area where three storey (11 metres) ‘apartment style’ developments are encouraged on land with a minimum area of 1,800m². Where the land comprises more than one lot, the lots must be consecutive lots which are side by side and have a shared frontage. The area of 1,800m² must all be in the same sub-precinct. All development in the Main Road sub-precinct should have a maximum site coverage of 60 percent.

Higher developments on the perimeter of the Main Road sub-precinct should be designed so that the height and form are sufficiently stepped down, so that the scale and form complement the interface of sub-precinct A or B, or other adjoining zone.

Sub-precinct A (shown on Manningham Planning Scheme maps as DDO8-2) is an area where two storey units (9 metres) and three storey (11 metres) ‘apartment style’ developments are encouraged. Three storey, contemporary developments should only

occur on land with a minimum area of 1,800m². Where the land comprises more than one lot, the lots must be consecutive lots which are side by side and have a shared frontage. The area of 1,800m² must be all in the same sub-precinct. In this sub-precinct, if a lot has an area less than 1,800m², a townhouse style development proposal only will be considered, but development should be a maximum of two storeys. All development in sub-precinct A should have a maximum site coverage of 60 percent.

Higher developments on the perimeter of sub-precinct A should be designed so that the height and form are sufficiently stepped down, so that the scale and form complement the interface of sub-precinct B, or other adjoining zone.

Sub-precinct B (shown on Manningham Planning Scheme maps as DDO8-3) is an area where single storey and two storey dwellings only will be considered and development should have a maximum site coverage of 60 percent. There is no minimum land area for such developments.

Development in Precinct 2 should:

- Provide for contemporary architecture
- Achieve high design standards
- Provide visual interest and make a positive contribution to the streetscape
- Provide a graduated building line from side and rear boundaries
- Minimise adverse amenity impacts on adjoining properties
- Use varied and durable building materials
- Incorporate a landscape treatment that enhances the overall appearance of the development
- Integrate car parking requirements into the design of buildings and landform.

Precinct 3 – Residential areas with Predominant Landscape Features

This precinct includes two separate areas including Wembley Gardens in Donvale and a part of Templestowe. The built form and characteristics of these areas is varied. The common feature is the vegetation, particularly the presence of large trees. The presence of the native and exotic vegetation in Templestowe and in Wembley Gardens gives these areas a distinctive environmental feel. Templestowe is in close proximity to the Yarra River. Development is required to be designed and sited to protect existing visual corridors that exist along the Yarra River and nearby parkland. The absence of front fences creates a sense of openness and reinforces the environmental character of the area.

In this precinct only minimal change is anticipated. Due to the importance of retaining and enhancing the existing vegetation, this precinct will encourage a low residential density in order to retain the existing native and / or exotic vegetation.

Dwellings need to provide generous front, side and rear setbacks to ensure spacing between dwellings when viewed from the street and to provide opportunities to conserve and enhance the existing pattern of vegetation and the existing landscape qualities of the precinct.

Buildings are to be designed to have regard to the natural landscape and topographic features of the site. On sites with a slope, methods to minimise height of floor level above natural ground level would be encouraged. Building height, design and materials should be designed to enable the dwelling to integrate with the surrounding area.

The prevailing character of low front fences, retaining walls, or the absence of front fences is also promoted.

Precinct 4 – Post 1975 residential areas

This precinct includes areas that have been predominately developed since 1975 with a substantial amount of development occurring between late 1980s and the 1990s.

Although some of the housing built in the 1970s is single storey, housing built in the 1980s and 1990s is predominantly double storey and in some instances three storeys.

In this precinct there is minimal unit development.

An incremental level of change is anticipated in this precinct.

Other Residential Areas

It is intended to retain and enhance the existing bushland character of the Warrandyte Township and the Hillcrest area, Donvale. Whilst these areas are excluded from the Residential Character Precincts, like Precinct 3 the common feature of these areas is the vegetation, particularly the presence of large trees. These areas predominantly contain native vegetation which gives these areas a distinctive environmental feel.

Within these areas only minimal change is anticipated. Due to the importance of retaining and enhancing the existing vegetation, a low residential density is encouraged in order to retain the existing native vegetation. The absence of front fences creates a sense of openness and reinforces the environmental character of these areas.

Generous front, side and rear setbacks should be provided to dwellings to ensure spacing between dwellings when viewed from the street and to provide opportunities to conserve and enhance the existing pattern of vegetation and the existing landscape qualities of these areas.

Buildings are to be designed to have regard to the natural landscape and topographic features of the site. On sites with a slope, methods to minimise height of floor level above natural ground level would be encouraged. Building height, design and materials should be designed to enable the dwelling to integrate with the surrounding area.

Environmental and landscape issues

A key challenge for Council is to achieve a balance between protecting environmental and landscape characteristics and accommodating changing housing needs. The provision of new housing is directed by strategies that protect and enhance landscape character, neighbourhood character and environmental values.

Because of the fragmented patchwork of native vegetation in Manningham, a substantial proportion of wildlife movements occur across residential areas characterised by scattered trees. These movements, and hence the landscape of these residential areas, are important to the maintenance of wildlife in Manningham.

Along habitat corridors and within treed residential areas, maintenance of native tree cover (and particularly the locally indigenous species) is the most important requirement for facilitating wildlife movements. These movements are important for the survival of both the wildlife and many indigenous plants that rely on wildlife for pollination, seed dispersal or pest control.

Some residential areas are within or adjacent to Core and Buffer Conservation areas. Proposals to subdivide or develop land will need to avoid, minimise and offset native vegetation removal and impacts.

Any proposals to subdivide or develop land will also need to have regard to constraints such as steep slopes and land prone to landslip, wildfire and flooding.

Economic development issues

Council encourages home-occupations as an important means of achieving economic development and providing opportunities that enable residents to work from home. Benefits to the business owner include reduced travel time and flexible hours, and support for micro start up businesses. The needs of these businesses should be addressed while ensuring that residential amenity is not adversely affected.

Non-residential uses and commercial developments which do not have a community service role are discouraged from locating in residential areas. Commercial development remote from activity centres is also discouraged in order to protect the amenity of residential areas, the viability of activity centres and to ensure the safe and efficient functioning of the road network.

21.05-213/02/2014
C96**Housing****Key issues**

- Accommodating population growth as outlined in *Melbourne 2030 Planning for Sustainable Growth* (2002).
- Providing a diversity of appropriate housing to meet changing lifestyles and housing needs.
- Need for urban consolidation to address housing growth.
- Potential impact of new development on the surrounding area.

Objectives

- To accommodate Manningham's projected population growth through urban consolidation, in infill developments and Key Redevelopment Sites.
- To ensure that housing choice, quality and diversity will be increased to better meet the needs of the local community and reflect demographic changes.
- To ensure that higher density housing is located close to activity centres and along main roads in accordance with relevant strategies.
- To ensure that areas removed from activity centres and main roads as well as areas with predominant environmental or landscape features are protected from higher density development.
- To promote affordable and accessible housing to enable residents with changing needs to stay within their local neighbourhood or the municipality.
- To encourage development of key Redevelopment Sites to support a diverse residential community that offers a range of dwelling densities and lifestyle opportunities.
- To encourage high quality and integrated environmentally sustainable development.

Strategies

Strategies to achieve these objectives include:

- Ensure that the provision of housing stock responds to the needs of the municipality's population.
- Promote the consolidation of lots to provide for a diversity of housing types and design options.
- Ensure higher density residential development occurs around the prescribed activity centres and along main roads identified as Precinct 2 on the Residential Framework Plan 1 and Map 1 to this clause.
- Allow housing development that respects existing neighbourhood character and supports incremental level of change in areas removed from activity centres and main roads identified as Precinct 1 on the Residential Framework Plan 1 and Map 1 to this clause.

- Maintain a low housing density in areas with predominate landscape features identified as Precinct 3 on the Residential Framework Plan 1 and Map 1 to this clause.
- Support an incremental level of change that respects existing neighbourhood character in residential areas developed post 1975 identified as Precinct 4 on the Residential Framework Plan 1 and Map 1 to this clause.
- Maintain a low housing density in areas with environmental values identified on the Residential Framework Plan 1 to this clause.
- Encourage development to be designed to respond to the needs of people with limited mobility, which may for example, incorporate lifts into three storey developments.
- Investigate the most appropriate suite of planning controls to achieve the desired outcomes for Key Redevelopment Sites.

Implementation

These strategies will be implemented by:

Zones and overlays

- Applying the Residential 1 Zone.
- Applying a Design and Development Overlay.
- Applying the Design and Development Overlay 8 to residential areas close to activity centres and along main roads (identified as Precinct 2 on the Residential Framework Plan 1 and Map 1 to this clause) to identify the location and direct the design of higher density residential development.
- Applying the Residential 3 Zone to residential areas removed from activity centres and main roads (identified as Precinct 1 on the Residential Framework Plan 1 and Map 1 to this clause) to ensure new development respects neighbourhood character and provides for an incremental level of change.
- Applying the Significant Landscape Overlay or Environmental Significance Overlay and the Design and Development Overlay to residential areas with predominate landscape features (identified as Precinct 3 on the Residential Framework Plan 1 and Map 1 to this clause) to ensure that the density, design and siting of residential development is appropriate to its landscape and the low housing density character of the area.
- Applying the Residential 1 Zone to residential areas developed since 1975 (identified as Precinct 4 on the Residential Framework Plan 1 and Map 1 to this clause) to provide opportunity for new development that respects neighbourhood character and for an incremental level of change.
- Applying the Environmental Significance Overlay and the Design and Development Overlay to areas of environmental significance to ensure that the density, design and siting of residential development is appropriate to its environment and the low housing density character of the area.

Policy and exercise of discretion

- Implementing the *Manningham Residential Strategy* (2002).
- Implementing the *Doncaster Hill Strategy* (2002).
- Implementing the *Manningham (Biosites) Sites of Biological Significance Review* (2004).
- Implementing the *Wildlife Movement and Habitat Needs in Manningham* (2009).

- Implementing the *Locally Threatened Plants in Manningham* (2010).
- Implementing the *Manningham Monterey Pine and Cypress Trees Assessment* (2003).
- Using Local Policy to guide the location, design and management of accommodation premises (*Accommodation premises policy, Clause 22.04*).
- Using Local Policy to ensure that people with limited mobility have the same level of access to buildings, services and facilities as any other person (*Access for disabled people policy, Clause 22.09*).
- Using local policy to conserve native vegetation (*Native vegetation policy, Clause 22.02*).
- Using Clause 22.15, *Dwellings in a Residential 3 Zone*, to ensure new development in residential areas removed from activity centres and main roads (identified as Precinct 1 on the Residential Framework Plan 1 and Map 1 to this clause) respects neighbourhood character and provides for an incremental level of change.
- Promote the provision of ramps and wide entrances to optimise accessibility within and around the home.
- Promote higher density residential development in locations close to activity centres and public transport (identified on the Residential Framework Plan 1 and Map 1 to this Clause).
- Using Clause 22.17 *Eastern Golf Course Key Redevelopment Site Policy*, to provide the strategic policy framework to guide the future redevelopment of the Eastern Golf Course Site.
- Implementing the *City of Doncaster and Templestowe Heritage Study*, (1991).
- Implementing the *Manningham Heritage Garden & Significant Tree Study – Stage 2*, (2006).
- Having regard to Meredith Gould Architects Pty Ltd (February 2011) *Eastern Golf Course Conservation Analysis and Policy*, Melbourne, Victoria.

Further strategic work

Other actions

- Identifying key development sites and encouraging residential development that responds to site constraints, demographic trends and the surrounding pattern of development.

21.05-3

13/02/2014
C96

Subdivision

Key issues

- Site responsive subdivision.
- Inappropriate infill subdivision.

Objectives

- Ensure subdivision responds positively to site features and constraints, integrates well with the neighbourhood, provides a functional environment and achieves energy efficient and environmentally sensitive layouts.

- To ensure the upgrading or provision of appropriate infrastructure and open space as part of subdivision proposals.
- To ensure that infill subdivision addresses future development impacts on adjoining properties and the neighbourhood.
- To ensure that subdivision adopts environmentally sustainable design principles.

Strategies

Strategies to achieve these objectives include:

- Encourage subdivision layouts that consider neighbouring uses and developments.
- Ensure that subdivision layouts adequately provide for the safety and security of residents and property.
- Ensure that subdivision and associated works in wildfire areas are appropriately sited, designed and managed to address wildfire risk.
- Ensure that subdivision and associated works avoid, minimise and offset native vegetation removal and impacts.
- Promote the consolidation of lots to increase design options.
- Ensure subdivisions are designed to provide adequate vehicle, pedestrian and bicycle links.
- Ensure that open space and infrastructure contributions are adequate.
- Require three-dimensional building envelopes for infill subdivision.
- Ensure subdivision design and layout considers lot orientation, size and location of building envelopes and integrated water management to achieve ecologically sustainable development outcomes.

Implementation

These strategies will be implemented by:

Zones and overlays

- Applying a Development Plan Overlay.
- Applying a Design and Development Overlay.
- Applying the Wildfire Management Overlay.
- Applying an Environmental Significance Overlay.

Policy and exercise of discretion

- Implementing the *Manningham (Biosites) Sites of Biological Significance Review* (2004).
- Implementing the *Wildlife Movement and Habitat Needs in Manningham* (2009).
- Implementing the *Locally Threatened Plants in Manningham* (2010).
- Using local policy to conserve native vegetation (*Native vegetation policy, Clause 22.02*).
- Implementing the *Manningham Monterey Pine and Cypress Trees Assessment* (2003).

- Using Local Policy to guide subdivision design that is responsive to the environmental and visual characteristics of the streetscape (*Battle axe blocks policy, Clause 22.11*).
- Using Local Policy to guide the protection of environmental and landscape values in identified Wildfire areas and identification and addressing of risks from wildfire (*Environmental and landscape significance protection in identified wildfire areas policy, Clause 22.14*).

Further strategic work

- Preparing a Local Planning Policy to direct subdivision within existing residential areas.
- Investigating the preparation of a development contributions plan for the municipality for areas outside the Doncaster Hill Activity Centre.

Other actions

21.05-4

13/02/2014
C96

Built form and neighbourhood character

Key issues

- Scale and form of residential development and its impact on neighbourhood character.
- Improving residential design standards.

Objectives

- To ensure that residential development enhances the existing or preferred neighbourhood character of the residential character precincts as shown on Map 1 to this Clause.

Strategies

Strategies to achieve these objectives include:

- Require residential development to be designed and landscaped to make a positive contribution to the streetscape and the character of the local area.
- Ensure that where development is constructed on steeply sloping sites that any development is encouraged to adopt suitable architectural techniques that minimise earthworks and building bulk.
- Ensure that development is designed to provide a high level of internal amenity for residents.
- Require residential development to include stepped heights, articulation and sufficient setbacks to avoid detrimental impacts to the area's character and amenity.

Implementation

These strategies will be implemented by:

Zones and overlays

- Applying the Mixed Use Zone.
- Applying the Activity Centre Zone.

- Applying a Vegetation Protection Overlay, Significant Landscape Overlay, Environmental Significance Overlay and/or Heritage Overlay where appropriate.
- Applying the Residential 1 Zone to residential areas developed since 1975 to provide opportunity for new development that respects neighbourhood character and for an incremental level of change.
- Applying the Residential 3 Zone to areas removed from activity centres and main roads to ensure new development respects neighbourhood character and provides for an incremental level of change.
- Applying the Design and Development Overlay to ensure that the design and siting of residential development is appropriate.

Policy and exercise of discretion

- Implementing the *Manningham Residential Character Guidelines* (2012).
- Using Clause 22.01, *Design and development policy*, and Clause 22.15, *Dwellings in a Residential 3 Zone*, to ensure that development is responsive to the scale and preferred character of the local neighbourhood.

Further strategic work

- Preparing residential design guidelines for the Warrandyte township.
- Reviewing the location of, and the preferred use and built form of, identified gateway sites.
- Preparing a Local Planning Policy to guide the future use and development of identified gateway sites, if appropriate.

Other actions

- Taking into account the views of Council’s Sustainable Design Taskforce on major development applications.
- Requiring applicants for significant proposals to engage in a collaborative design process including pre-application meetings with relevant Council staff.

21.05-5

13/02/2014
C96

Environmental and landscape issues

Key issues

- Impact of land use and development on biodiversity.
- Protection and enhancement of environmental values and significant landscapes.
- Design and construction of development in areas with topographical constraints and areas of environmental significance, landscape character and wildfire risk.

Objectives

- To ensure that land is developed in a way that is compatible with, and protects and enhances the character of the area, its landscape qualities, pattern of vegetation and environmental values.
- To ensure that the environmental significance, visual and landscape character of residential areas with environmental and/or landscape values, including the Warrandyte

township, parts of Templestowe, Wonga Park, the Hillcrest area and Donvale/Doncaster East are maintained and enhanced.

- To ensure that development avoids, minimises and offsets native vegetation removal, protects habitat corridors and threatened species of flora and fauna.

Strategies

Strategies to achieve these objectives include:

- Require a site analysis plan of the site and surrounds showing the existing topographic and visual features and how a proposal responds to environmental and landscape features for all relevant planning proposals.
- Retain the predominance of single dwellings on allotments and discourage other forms of inappropriate residential development in areas of environmental significance.
- Ensure that development in areas with recognised environmental and landscape values are designed to minimise the impact on vegetation and protect landscape character and heritage values.
- Require that buildings and works minimise visual impact by locating away from ridgelines and exposed slopes, incorporating screening treatments and non-obtrusive materials and colours.
- Encourage development on sloping sites to adopt suitable design techniques that minimise earthworks and building bulk.
- Ensure that development in areas of environmental significance avoids, minimises and offsets the removal of and impacts on native vegetation.
- Avoid development, including vegetation removal, on land with slopes of greater than 20%.
- Ensure that buildings are set back appropriate distances from property boundaries to provide for landscaping and the inclusion of canopy trees.
- Ensure that development does not protrude above the prevailing height of the tree canopy in environmental residential areas.
- Ensure that existing trees are retained where appropriate and that replacement trees complement the character of the area.
- Ensure that buildings and/or works in wildfire areas are appropriately sited, designed and managed to address wildfire risk.
- Encourage development that meets higher construction standards and/or utilises alternative treatments to address wildfire risk in preference to vegetation removal.
- Encourage the longevity of older exotic species with landscape character or heritage values.
- Discourage inappropriate development and landscaping on sites adjacent to State Parks and other conservation reserves.

Implementation

These strategies will be implemented by:

Zones and overlays

- Applying the Residential 1 Zone.

- Applying a Design and Development Overlay to the Warrandyte township, parts of Templestowe and parts of Donvale and Doncaster East.
- Applying an Environmental Significance Overlay and/or Significant Landscape Overlay.
- Applying a Vegetation Protection Overlay.
- Applying the Wildfire Management Overlay.

Policy and exercise of discretion

- Implementing the *Manningham Residential Character Guidelines* (2012).
- Implementing the *Manningham Heritage Garden & Significant Tree Study – Stage 2* (April 2006) which identifies vegetation of significance to be protected and maintained.
- Implementing the *Manningham (Biosites) Sites of Biological Significance Review* (2004).
- Implementing the *Wildlife Movement and Habitat Needs in Manningham* (2009).
- Implementing the *Locally Threatened Plants in Manningham* (2010).
- Using local policy to conserve native vegetation (*Native vegetation policy, Clause 22.02*).
- Implementing the *Manningham Monterey Pine and Cypress Trees Assessment* (2003).
- Using Local Policy to guide the protection of environmental and landscape values in identified Wildfire Areas (*Environmental and landscape significance protection in identified wildfire areas policy, Clause 22.14*).

Further strategic work

- Implementing the *Roadside Environmental Management Strategy* (2004).
- Review the *Roadside Environmental Management Strategy* (2004) with regard to the CFA Roadside Management Guidelines.
- Investigate the use of a local law or planning scheme control to protect significant trees in residential areas that do not have appropriate overlay controls.
- Identify areas for strategic revegetation to enhance habitat corridors and habitat connectivity.

Other actions

- Continuing to control and remove introduced pest plants and pest animals on a priority basis, with emphasis on the provisions under the *Catchment and Land Protection Act 1994* and direction from the Catchment Management Authority.

21.05-6

02/10/2008
C52

Economic development issues

Key issues

- Impact of discretionary uses on residential amenity.
- Impact of non-residential and commercial uses located outside of activity centres on the viability of activity centres
- Linear commercial development outside activity centres.

Objectives

- To encourage uses with a community service role to locate in close proximity to activity centres or other community based facilities.
- To ensure that business activities do not compromise the residential amenity and character of the neighbourhood.
- To ensure that the range of uses within mixed use developments are compatible.
- To locate commercial uses such as restaurants within activity centres.
- To discourage the rezoning of land for commercial uses outside activity centres.

Strategies

Strategies to achieve these objectives include:

- Ensure that the establishment of uses with a community service role do not compromise the amenity of the neighbourhood.
- Ensure that commercial uses are located within activity centres wherever possible.
- Ensure that in considering planning permit applications for home occupations, adequate provision is made for on-site car parking and loading areas and that these are adequately screened from the street and adjoining land.
- Limit the impact of advertising signs on visual amenity.
- Ensure that the range of uses within a mixed use development does not adversely impact on each of the respective uses.

Implementation

These strategies will be implemented by:

Policy and exercise of discretion

- Implementing the *Home-Based Business Strategy* (1996) that encourages the establishment of appropriate businesses that do not compromise residential amenity.
- Implementing the *Manningham City Council 2003-2006 Economic Development Strategy* (2003).
- Using Local Policy to ensure that non-residential and commercial uses do not affect the amenity of the area. (*Design and development policy, Clause 22.01, Accommodation premises policy, Clause 22.04, Non-residential uses in residential areas policy, Clause 22.05 and Eating and entertainment policy, Clause 22.06*).
- Using Local Policy to ensure that advertising signs do not impact on visual amenity (*Outdoor advertising signs policy, Clause 22.07*).

Zones and overlays

Further strategic work

Other actions

- Promoting and distributing Manningham's *Home-based Business Information Kit* (2005).
